Streamline Operations with a One-Stop Application Platform

APPCENTER

Applications Available for AppCenter

- BookingApp
- Customer Manager
- Queue Manager
- Voucher Manager
- TTY Manager
- NDC Configuration

Navitaire's web-based agent platform combines the efficiency of a thin-client system with the speed and flexibility of an app.

Say goodbye to the days of loading updates to individual workstations, excessive compatibility testing and multiple logins.

AppCenter is the modern way to manage agent applications and streamline servicing. Our new, one-stop application platform houses agent-centric interfaces for Navitaire developed applications, leveraging the Digital APIs for application updates and deployments.

AppCenter gives you the functionality to support back-office tasks for the Navitaire Airline Platform, backed by the benefits of cloud technology:

- Features single sign-on authentication for speedier movement between applications
- Simplifies application deployments and updates through a central server
- Controls application access through security-based user roles
- Supports ticketless and e-ticket reservations, interline booking, award travel, vouchers and more
